

Programming Logic and Design

ALICE Projects

On the www.syl9.com website you need to do the **Confused Kangaroo** and **Circling Fish** projects.

You are to create another ALICE project with the following requirements:

1. Must last at least 45 seconds
2. Must consists of 5 or more objects
3. Must have sound
4. Two or more objects must animate (move) at the same time.

The project may consist of any theme that you want.

NOTE: Alice files are saved with a `.a2w` file extension.

You are to complete these three projects and email your saved files to csci19206@yahoo.com . The projects are due by Tuesday, May 10, 2011. Do not email the assignments to my BRCC email account, because they may bounce back.
