

C++ Programming Project 1

Write a C++ program that you will have to load and demonstrate in the class on Tuesday that will output your FULL NAME, MAJOR, COURSE NAME, and SEMESTER and the specified string of characters. (Each on a new line.)

Sample output:

```
David Sylvester  
Computer Science  
Introduction to Programming Logic  
Fall 2011  
Michael "Air" Jordon - * NBA's Top 50 *
```

C++ Programming Project 2

Write a C++ program that you will have to load and demonstrate in the class on Tuesday that will use a **for loop** to print out the numbers 1 through 10 multiplied by 2. (Each on a new line.) **Note: The numbers printed should be printed by using a variable.**

Sample output:

```
2  
4  
6  
8  
10  
12  
14  
16  
18  
20
```
